***Allowable Subject Matter***

Claims 1, 2 and 4-7 allowed.

The closest relevant prior art is Hight (4,227,315) wherein Hight discloses a cloth dryer (10) having an enclosure with a rectangular cross section with an open end with an inlet (19) and an outlet (20), a cover (15) removably mountable to the open end of the enclosure, a filter (18) having proximal end secured to the cover (16) and side edges slidably engageable with the interior surface (17) between the inlet (19) and the outlet (20), wherein the filter is in the slanted or tilted position (see Fig. 1). Claims 1, 2 and 4-7 of this instant invention differ from the disclosure of Hight in that the interior chamber of the lint trap has unobstructed walls that are sealed together at least two interior corners and the filter is slidably engaged in those two interior corners without requiring additional structures such as rails or supports.
